```

```
# tar -vxf centreon-widget-hostgroup-monitoring-1.1.1.tar.gz
```

```
# tar -vxf centreon-widget-servicegroup-monitoring-1.1.0.tar.gz
```

```
# tar -vxf centreon-widget-service-monitoring-1.1.2.tar.gz
```

Renommer chaque dossier en suivant ce modèle -> mv centreon-widget-host-monitoring-1.1.2/ host-monitoring

Installation des Widgets

Depuis l'interface web de Centreon, se rendre dans Administration > Modules > Widgets > Setup

The screenshot shows the Centreon web interface. At the top, there's a status bar with 'Poller States' and 'Services' counts. The main navigation bar includes 'Home', 'Monitoring', 'Views', 'Reporting', 'Configuration', and 'Administration'. The left sidebar shows 'Modules', 'Setup', 'Widgets', and 'Connected'. The main content area is titled 'Administration > Modules > Setup' and displays a table of widgets.

Title	Description	Version	Author	Actions
Service Monitoring	Widget for displaying service monitoring information	1.1.2	Merethis	
Hostgroup Monitoring	Widget for displaying hostgroup monitoring information	1.1.1	Merethis	
Host Monitoring	Widget for displaying host monitoring information	1.1.2	Merethis	
Servicegroup Monitoring	Widget for displaying servicegroup monitoring information	1.1.0	Merethis	

Clic sur l'icone tout à droite de chaque widget pour l'installer.

This block shows a close-up of the widget table from the previous screenshot, with a red arrow pointing from the 'Install' icon of the 'Host Monitoring' widget to a confirmation dialog box.

Title	Description	Version	Author	Actions
Service Monitoring	Widget for displaying service monitoring information	1.1.2	Merethis	
Hostgroup Monitoring	Widget for displaying hostgroup monitoring information	1.1.1	Merethis	
Host Monitoring	Widget for displaying host monitoring information	1.1.2	Merethis	
Servicegroup Monitoring	Widget for displaying servicegroup monitoring information	1.1.0	Merethis	

The dialog box is titled 'The page at https://lx6-nagios01 says:' and contains the question 'Would you like to install this widget?'. It has two buttons: 'OK' and 'Cancel'.

Une fois les widgets installés, se rendre sur la page d'accueil de centreon ->

Clic sur « Add view » pour ajouter une page personnalisée et lui assigner un nom ->

The screenshot shows the 'Add a new view' form. It has a 'General Information' section with a 'View name' field containing 'Test Widget' and a 'Layout' section with radio buttons for '1 Column' (selected), '2 Columns', and '3 Columns'. At the bottom are 'Submit' and 'Reset' buttons. A close button (X) is in the bottom right corner.

Clic ensuite sur « Add widget » pour ajouter des widgets à la page personnalisée ->

Choisir un nom et sélectionner le widget désiré ->

The screenshot shows the 'Add a new widget' form. It has a 'Widget Information' section with a 'Widget Title' field containing 'Hostgroup Monitoring'. Below this is a table of available widgets:

	Title	Version	Description	Author
<input type="radio"/>	Centreon Host Monitoring	1.1.2	Widget for displaying host monitoring information	Merethis
<input checked="" type="radio"/>	Centreon Hostgroup Monitoring	1.1.1	Widget for displaying hostgroup monitoring information	Merethis
<input type="radio"/>	Centreon Service Monitoring	1.1.2	Widget for displaying service monitoring information	Merethis
<input type="radio"/>	Centreon Servicegroup Monitoring	1.1.0	Widget for displaying servicegroup monitoring information	Merethis

At the bottom are 'Submit' and 'Reset' buttons.

Installer tous les widgets désirés en suivant cette méthode. Une fois tous les widgets installés et configurés, choisir « Set default » pour faire de cette page, notre page d'accueil par défaut ->

Le résultat final de la page d'accueil de centreon, après s'être logué, est le suivant ->

A screenshot of the Centreon web interface after login. The browser address bar shows '10.62.8.121/centreon/main.php?p=103'. The page header includes the Centreon logo and a status bar with various metrics. The main content area is divided into two panels: 'HOST's monitoring' and 'SERVICE's monitoring'. The 'HOST's monitoring' panel displays a table with columns: Hostname, Alias, Address, Status, Duration, Hard State, Last Check, Attempt, and Output. It lists several hosts, including ADPQSI 41-2001, ADPQSI 42-2002, ADPQSI 43-2003, ADPQSI 44-2004, ADPQSI 45-2005, ADPQSI 46-2006, ADPQSI 47-2007, API100, API101, API103, API104, API105, API106, API107, API108, API112, API113, API114, and API115. The 'SERVICE's monitoring' panel displays a table with columns: S., Host, Service, Status, Duration, Hard State, Last Check, Attempt, and Output. It lists services for various hosts, including Centreon-Server, HSRP_Core_Switch, LV_ALVA_01, LV_APP05, LV_AUTOCOM, LV_CHET11, Cisco CPU LOAD, GigabitEthernet3/3, GigabitEthernet4/2, GigabitEthernet4/4, GigabitEthernet4/5, and GigabitEthernet4/6. The page footer shows the date '2015/09/16 12:10'.
